

Congratulations to
Delaware County
Memorial Hospital.

For being awarded
stroke certification.
For awarding him
a second chance.

FIRST CERTIFIED PRIMARY STROKE CENTER IN DELAWARE AND CHESTER COUNTIES

Within 4 minutes of a stroke, damage to brain cells occurs. Within a few hours, the cells can die completely. The result is potential loss of memory, speech, motor control and other debilitating injuries. NEVER ignore things like sudden numbness or weakness on one side of the body, slurred speech, trouble seeing, confusion or headache. If you think you or a loved one is having a stroke, [CALL 911 IMMEDIATELY](#). The faster the response, the sooner you'll receive medical attention and consideration for thrombolytic treatment. Delaware County Memorial Hospital (DCMH) is the only stroke program in Delaware County certified with the Gold Seal of Approval from The Joint Commission. Certification means that our program has demonstrated that it follows national standards and guidelines that can significantly improve outcomes for stroke patients (as defined by The Joint Commission and the American Stroke Association).

THE CERTIFIED STROKE PROGRAM AT DELAWARE COUNTY MEMORIAL HOSPITAL
